exemptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

There is a surplus not granted by permit users. Since 1994, new approaches have been adopted to encourage appropriate rights which can be exercised only when appropriate rights are granted to waters "foreign" to the natural stream system.

A riparian grant holder has an ownership interest in the stream to take water from it for his or her personal use. A riparian land owner may never have been served from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.
